

EE893

Digital CO₂ Sensor Module for OEM Applications

The E+E CO₂ module EE893 is designed for OEM applications and for demanding environment. A multiple point CO2 and temperature adjustment procedure leads to excellent CO2 measurement accuracy over the entire temperature working range; this is a must for process control and outdoor applications.

The E+E dual wavelength NDIR CO₂ sensing procedure compensates automatically for ageing effects. EE893 is highly insensitive to pollution and offers outstanding long term stability.

With its small dimensions and electrical connection via contact pins and pads, EE893 is the optimal choice for OEM devices such as wireless transmitters, hand-helds or data loggers. The measured data, with a range of up to 10000ppm, is available on the E2 digital interface.

An optional kit facilitates easy configuration and adjustment of the module. The measurement interval can be set according to the application requirements; by this the average current consumption can be reduced to less than 60µA for battery-operated devices.

Typical Applications _

Data loggers Hand helds Wireless transmitters **Building management Demand controlled ventilation**

Key features Autocalibration Outstanding long-term stability Temperature compensation Low power consumption Very small size

Technical Data

Measured values

COa

_			
Measurement principle	Dual wavelength (non-dispersive infrared technology) NDIR		
Working range	02000 / 5000 / 10000ppm		
Accuracy at 25°C and 1013mbar 1)	02000ppm:	< ± (50ppm +2% of measuring value)	
(77°F and 14.69psi)	05000ppm:	< ± (50ppm +3% of measuring value)	
	010000ppm:	< ± (100ppm +5% of measuring value)	
Response time t ₉₀	105s with measured data averaging (smooth output) 60s without measured data averaging		
Temperature dependency	typ. 1ppm CO ₂ /°C (-2045°C) (-4113°F)		
Calibration interval 2)	>5 years		
Measuring time interval	adjustable from 15s up to 1h (factory setting: 15s)		

General

~				
Digital interface	E2 (details: www.epluse.com)			
Supply voltage	4.75 - 7.5V DC			
Average power consumption 3)	58µA (at 1h measurement interval)3.7mA (at 15s measurement interval)			
Peak current	see power consumption graph			
Electrical connection	contact pins, edge card socket (e.g. type MEC1-108-2)			
Working conditions	-4060°C (-40140°F) 095% RH (not condensating) 85110kPa (12.3315.95psi)			
Storage conditions	-4060°C (-40140°F) 095% RH (not condensating) 70110kPa (10.1515.95psi)
